

PROJECT COLLECTION

COTTO[■]

From the first tile, it was the beginning

Vision World Class Ambition

The visionary goal of Cotto is always directed around the notion of being recognized as “One of the world class leaders in the ceramic tile business” through the value creation delivered to customers by our good quality products and professional services.

Reference projects

Customer Reliability

To us, nothing is more precious than confidence from customers. During the past years, Cotto has continually built its reputation from consistent quality supplies and services to many projects that may look back with pride

- Suvarnabhumi International Airport
- Siam Paragon
- Emirates Place in UAE
- Asian Game Complex in Qatar
- Kelvin Grove Urban Village in Australia

All professional supports are also provided to ensure that customers receive the right information, products and services required before and after sales.

COMPANY PROFILE

Domestic and International Sales

Delivering Trust

From the visionary challenge to be in the forefront of global leader. We commit ourselves to provide good quality products and professional services to both Thai and Global markets. Cotto has also shown its strong dedication to the global market supply through its participation in all the major international trade shows in the ceramic domain with its current distribution networks in more than 50 countries worldwide.

Prestigious Achievement

Cotto - is the brand name of Thai Ceramic Co.,Ltd. well-known among the global professionals in the ceramic business for more than 25 years and has obtained some prestigious recognitions. As a subsidiary of the Siam Cement Group, the company follows the same guiding principles that reflect the truly ethical corporate governance :

- Adherence to Fairness
- Dedication to Excellence
- Belief in the value of the Individual
- Concern for Social Responsibility

It has begun, and It will continue ... Tiles and beyond

*Our products also meet EN standard and ASTM standard. Test results are available upon request.

Classification of glazed tiles for floors according to their abrasion resistance (PEI)

PEI 3

Floor coverings in areas that, with normal footwear are walked on more often with small amounts of scratching dirt (for example residential kitchens, halls, corridors and terraces).

PEI 4

Floor coverings that are walked on by regular traffic with some scratching dirt (for example entrances, commercial kitchens, hotel, exhibition and sales rooms).

PEI 5

Floor coverings that are subject to severe pedestrian traffic over sustained periods with some scratching dirt (for example public areas such as shopping centers, airport).

Classification of pedestrian surface materials according to the oil-wet ramp test (R-test)

The oil-wet ramp method is a method for the measurement of the frictional characteristics of pedestrian surface materials.

Principle : Two test persons, wearing standard test shoes, are used to determine the angle of inclination at which safe walking no longer occurs, after the pedestrian surface material being tested has been coated with engine lubricating oil. The test persons, each in turn, facing downhill and with an upright posture, move backwards and forwards over the test surface, as they increase their angle of inclination, until the safe limit of walking is reached. The angles of inclination obtained at such limits are used to assess the friction characteristics of the test surface. The mean acceptance angle obtained is used to assess the degree of slip resistance. Subjective influences on the acceptance angle are limited by means of a calibration procedure.

Remark : The oil-wet ramp test will not be applied for polished tiles.

Classification	Angle (degrees)
R9	$\geq 6 < 10$
R10	$\geq 10 < 19$
R11	$\geq 19 < 27$
R12	$\geq 27 < 35$
R13	≥ 35
